

PROFILE OF INNOVATION

CES Registered Provider Program Summary Handout

IDCEC CC - 114611

Provider: Schluter Systems Canada INC

AIA Program #SCHL17A

Program: Design 101: Designing with Profiles

Length: 60 Minutes

HSW: Yes

Credits: 1 L.U

Description: Manufactures produce a variety of beautiful and durable tiles, but the availability of coordinating trim pieces can be limited. This has led to the development of a wide range of trim profiles. This seminar will focus on how trim profiles improve the integrity of the tile installation and increase the versatility of tile in various applications, including floors, walls, countertops and more.

Learning Objectives: At the end of this presentation, the participant will be able to:

1. Identify tile trim profiles and understand their basic design and function.
2. Diagnose common transition issues and learn how to select proper edge protection treatment.
3. Understand the need for movement joints in tile assemblies based on current industry standards.
4. Understand how to incorporate trim profiles into ceramic tile and dimension stone installations.

Approach: A PowerPoint presentation that incorporates numerous photos of trim profiles, including installation and finish shots will be used. There will be a question-and-answer period at the end of the program. However, questions are encouraged throughout the presentation as well.

A/V Needed: Electrical power and a screen for the PowerPoint presentation.
(The CES facilitator will supply the laptop and projector)

Target Audience: Junior architects, specifiers, owners, and interior design professionals in the residential and commercial markets.
Ideal audience size: 10 to 20 people

Facilitator Qualifications: All of Schluter Systems facilitators have been with the company for a minimum of 3 years, and average 10 years in the tile industry. The CES facilitators receive in house training on CES guidelines and presentation skills.

Cost: Non-applicable: There is no fee for bringing this program into a firm or chapter meeting
