**IDCEC CC - 114615**

**Provider:** Schluter Systems Canada INC

**AIA Program #SCHL18A**

**Program: Design 102: Waterproofing and Finishing Tiled Showers**

**Length:** 60 Minutes

**HSW:** Yes

**Credits:** 1 L.U

**Description:** This presentation introduces the bonded waterproofing system. Highlighting the importance of waterproofing moisture sensitive building materials with bonded waterproofing technology and how it has improved tiled showers. This seminar will also look at where design can meet function with design elements that we can incorporate into tiled showers.

**Learning Objectives:** At the end of this presentation, the participant will be able to:

1. Identify the benefits and challenges of tiled showers.
2. Understand the bonded waterproof system components required to meet industry standard.
3. Understand how to incorporate trim profiles into tiled shower assemblies, providing transitions for curbless and barrier free spaces, as well as profiles that will meet industry guidelines for slope requirement.

**Approach:** A PowerPoint presentation that incorporates numerous photos of trim profiles, including installation and finish shots will be used. There will be a question-and-answer period at the end of the program. However, questions are encouraged throughout the presentation as well.

**A/V Needed:** Electrical power and a screen for the PowerPoint presentation.  
(The CES facilitator will supply the laptop and projector)

**Target Audience:** Junior architects, specifiers, owners, and interior design professionals in the residential and commercial markets.  
Ideal audience size: 10 to 20 people

**Facilitator Qualifications:** All Schluter Systems facilitators have been with the company for a minimum of 3 years, and average 10 years in the tile industry. The CES facilitators receive in house training on CES guidelines and presentation skills.

**Cost:** Non-applicable: There is no fee for bringing this program into a firm or chapter meeting
